PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 9.34/10) with hands-on experience building backend applications using Java, Python, Spring Boot, and REST APIs. Experienced with SQL, Kafka, Redis, Docker, and AWS, with strong foundations in DSA, OOP, OS, DBMS, and Computer Networks. Solved 500+ LeetCode problems and built distributed, event-driven systems through internships and projects.

EDUCATION

B.M.S. College of Engineering

B.Tech in Computer Science & Engineering

Expected 2028

Bangalore, India

- Currently in 5th Semester with a cumulative CGPA of 9.34/10.0.

EXPERIENCE

OneTappe

Backend Developer Intern

Jul. 2026 – Present

Bangalore, India

- Engineered robust RESTAPI services utilizing Java and Spring Boot, adhering to high-level architectural patterns and systematic server design.
- Contributed to AI chatbot infrastructure, focusing on intent recognition, complex request handling, and optimized conversational response management.
- Architected the server-side environment for a specialized OneTappe web platform, orchestrating API integration and core modular components.
- Utilized PostgreSQL, MySQL, and NoSQL databases alongside JWT and Redis; managed containerization and production deployment via Docker.

Infyntrek Systems

Java Developer Intern

Feb. 2026 – Apr. 2026

Bangalore, India

- Engineered and sustained scalable RESTful services with Java and Spring Boot, driving backend operations for the FarmSync management ecosystem and the Trace360 tracking architecture.
- Constructed core server-side modules for FarmSync and spearheaded the development of live tracking capabilities for Trace360, focusing on API integration and high-concurrency data management.
- Optimized system-wide debugging and code maintainability through systematic refactoring; participated in cross-functional collaboration via Git-driven Agile methodologies.

PROJECTS

OrbitMQ | Java, TCP/NIO, Gradle, JUnit

[Github](#)

- Designed a specialized binary protocol utilizing length-prefixing over TCP for low-latency producer-consumer exchange, bypassing standard overhead.
- Developed a partitioned storage engine based on append-only logs, featuring offset indexing and persistent segments for high-durability messaging.
- Orchestrated fault-tolerant leader-follower replication incorporating automatic failover mechanisms and ISR-style acknowledgement logic.
- Integrated consumer group offset management to ensure at-least-once delivery and facilitate parallelized consumption progress tracking.

FailSafe-AI | React, Python, FastAPI, PostgreSQL, WebSocket

[Github](#)

- Engineered a robust safety benchmarking framework for AI agents, prioritizing automated behavior assessment and adversarial threat benchmarking.
- Engineered backend infrastructure to facilitate multi-turn testing cycles, real-time execution tracing, and automated diagnostic analysis.
- Constructed an integrated dashboard for monitoring safety performance metrics, agent response patterns, and live scenario progression.
- Delivered comprehensive safety audits and data-driven insights to mitigate vulnerabilities and enhance system-wide reliability.

SKILLS

Languages: Java, C, Python, JavaScript, SQL

Backend: Spring Boot, Node.js, FastAPI, REST APIs, Spring MVC, JPA, JWT Authentication, WebSocket

Databases: PostgreSQL, MySQL, MongoDB, Database Design, Query Optimization

Distributed Systems & Messaging: Kafka, RabbitMQ, Redis, TCP/IP

Cloud & DevOps: AWS, Docker, Git, GitHub

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design, Distributed Systems

ACHIEVEMENTS

- Shortlisted for Google BigCode 2026.
- Qualified for Round 3 of Flipkart GRiD 8.0, showcasing technical excellence in a national-level challenge.
- Selected to participate in an ISRO student outreach programme conducted by the Indian Institute of Remote Sensing (IIRS), Dehradun.
- Secured a position in the Top 5 at the CodeForge Hackathon, competing against more than 50 teams.
- Recognized as Runner-Up at the Algothon Hackathon for innovative problem-solving.
- Solved 500+ LeetCode problems covering complex algorithms; attained a competitive Contest Rating of 1620.
- Active open-source contributor on GitHub, delivering bug fixes, feature updates, and performance optimizations.
